## ATD Show

Westgate Las Vegas Resort and Casino  
February 14 - 16, 2020

1. Trade Show Electrical (TSE) Jurisdiction (Requires labor and/or material) – All distribution of electrical wiring. All facility overhead and floor distribution of electrical wiring. All materials for floor distribution must be supplied by TSE. All motor and equipment hook-ups requiring hard wiring connections. Installation and/or repair of electrical fixtures. Installation of electrical motors and electrical apparatus to be energized.
2. Total combined wattage within booth space exceeding 20 amps will require electrical booth work labor. Labor is required to inspect and hook-up equipment pre-wired to plug into our systems. Exhibitors are not permitted to use power unless ordered. Exhibitors found using outlets without an order will be subject to the regular rate for outlets used. Sharing power or plugging into facility outlets is strictly prohibited.
3. No outside/external additional power sources are allowed. All show power must be provided by the official Electrical Service Contractor unless special approval is provided.
4. Electrical requirements for an exhibit at all convention facilities are for the safety of all Exhibitors and are based on national electrical codes and local ordinances. Too frequently, fires have been traceable to faulty wiring, sometimes because of carelessness and sometimes because of lack of understanding the risks involved. If an Exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to the convention facilities.
5. Serious risks are involved, which can be eliminated by understanding basic requirements of safe wiring inside your booth. For the safety of you and the public and to avoid code violations, remember these points:
  - All wiring must have a 3-wire grounded cord with a minimum of #14 gauge.
  - Spot or flood lighting is a hazard when lamps are too close to fabrics or other material which can be affected by heat.
  - Cube taps and multi-headed extension cords are not allowed.
  - The use of clip-on sign sockets, latex, or lamp cord wire in displays, or the use of 2-wire clamp on fixtures, is prohibited by order of fire prevention bureaus at trade shows and conventions.
  - Zip cords or two-wire cords are ungrounded and could result in safety hazards. Their use is forbidden in all convention facilities. Please leave all 2-wire cords at home.
  - Exhibitor is responsible for providing surge protectors for their goods. Daisy chaining of power strips is not allowed. TSE is not responsible for loss or damage resulting from power surges. Furthermore, TSE's liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less.
  - You may pre-wire your equipment to match our receptacles. Any other modifications are not accepted. Here is a list of the plugs that match our equipment receptacles:
    - 5 amp 120 volt: Standard U-ground cord cap
    - 20 amp 208 volt 1phase or 3phase: Leviton 3521 or Hubbell 3521
    - 60 amp 208 volt 1phase or 3phase: Daniel Woodhead Plug Y560P
    - 100 amp 208 volt 1phase or 3phase: Litton-Veam Plug CIR01GRH
6. In the interest of public safety, exhibits at all convention facilities may be inspected to determine if any violations exist. If they are found, qualified electricians are available to correct the problems. This work will be performed on a time and materials basis. If the Exhibitor does not wish to have the fault corrected, electrical service to the offending booth will not be connected. A fee of \$300.00 may be assessed for the safety and rules violation.

7. TSE is not responsible for voltage fluctuation or power failure due to temporary conditions. Exhibitor is responsible for providing surge protectors for their Goods. TSE is not responsible for loss or damage resulting from power surges. Furthermore, TSE's liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less. All electrical installations and connections to all electrical service should be made by a TSE electrician. TSE will not be responsible for any damage or loss to any equipment, component, computer hardware or software, and/or any damage or bodily injury to any person caused by installation, connection, or plugging in of any electrical outlet by persons other than a TSE Electrician.

**Reminder****Reminder:**

- Check rating plates on your equipment to ensure that you will have the proper power to operate your display.
- Order 24 hour power if required for refrigeration, computer systems, water pumps, heaters, etc.

# Electrical Services Frequently Asked Questions

All orders are governed by the TSE Payment Policy and TSE Terms & Conditions of Contract as specified in this Exhibitor Services Manual.

## ATD Show

Westgate Las Vegas Resort and Casino  
February 14 - 16, 2020

### How do I know how much power I need?

First, gather a list of all electrical equipment to be powered on in your booth. Consider some of the following elements: lighting, computer equipment, plasmas, company products, AV equipment, and lead retrieval machine. Next, you will want to notate where in your booth space the items will be placed and retrieve the power required for each item. The power voltage/wattage/amperage can be found on the equipment tag located in the back of the item. Typically most items require 110/120 volt power. Machinery leans more towards the 208 or 480 volt power ordered either in single phase or 3 phase. Now you can start calculating how power will be required in each area in your booth space. Start by combining the wattage for the 110/120 volt devices in each area and select an outlet that meets or exceeds this total. It is safer to slightly overestimate your power requirements to help minimize tripping or outages. You must order separate outlets for each electrical apparatus with a minimum of 5 amp at each location.

120 Volt Single Phase  
60 Cycle  
1000 Watts

230 volts  
30 Amps  
3 Phase

### Is this price listed for power per day?

No, the prices listed on the Electrical Outlets Price List are for the duration of the show.

### Where does the power come from?

At the Las Vegas Convention Center, the power source comes from different areas depending on the halls. The North and Central Halls 3-5 have catwalks available which means the power will drop from the ceiling. In the Central Halls 1-2, and all the South Halls, the power comes from the columns placed throughout the exhibit space, meaning the power is run along the floor. 380volt/480volt power must be run overhead for safety reasons. Additional costs apply. For the outdoor lots, power is pulled from either the building, generator, or alternate source and run along the floor. No outside external additional power sources are allowed. All show power must be provided by the official Electrical Service Contractor unless special approval is provided.

### Where will my power be located?

For inline and peninsula booths, you will find your power located on the back side of your booth space. Island/Pavilion booth exhibits will need to submit a diagram indicating where your main power source needs to start from. If TSE does not receive this information, the power will be installed in the center of your booth. Any movements of the main power source after installation will be chargeable on time and materials basis. The first ninety feet of cabling to deliver power to your booth is free. If additional cabling is necessary to power your booth, it will be charged on material and motorized equipment basis. If additional cabling is necessary to power your booth, it will be charged on time, material, and motorized equipment basis. In the following diagrams, the symbol represents the approximate location of power outlets. Main Drop Locations must be indicated on the floor plan as MDL. For Island or Pavilion booths, you need to designate one location for each outlet you order. Multiple outlet locations will be charged on a time, equipment and material basis.

Inline Booths

Peninsula Booths

Back-to-Back Peninsula Booths

Island/Pavillion Booths

One drop will be provided within the booth when power source is in the ceiling or one location on perimeter when power is in the floor.

### What is a Main Drop Location (MDL)/Additional Drop?

MDL is the main power source located in your booth. Power is then distributed from this point. If you do not want cords run on the floor throughout your booth, you may choose to request additional drops within your booth space billed on time, equipment, and material basis. The location of the main drop should be placed in area that can either be hid or kept out of sight (i.e. closet or storage area).

011695420  
010320

E-1b 112119

## How many places do I have to plug into?

For the inline booths that request their power at the back of the booths, the outlet may provide up to two connection points to plug into. Power strips can provide additional sockets, but keep in mind the power you have reserved for your booth space. Additional sockets do not mean additional power. Power strips are designed to trip at 1500 watts/15 amps. Use of the power strip on a 2000 watt outlet location will drop the use in that location to 1500 watts/15 amps. All orders exceeding 120 volts/20 amps provide one connection point only. They cannot accommodate power strips and require labor.

## Do I need 24 hour power?

If you have equipment that requires power service to be on throughout the entire show (i.e. refrigerators, programmable equipment), we would recommend ordering 24 hr services. Power is turned on ½ hour before the show opens and turned off ½ hour after the show closes.

## When will my power be turned on during move-in?

Every attempt is made to have power installed by the end of day on exhibitor's assigned target date. Freight hold areas (typically by freight doors) are done as space becomes available. Any special requests should be communicated to the TSE Department pre-show. Once on-site, please visit the TSE Service Desk.

## Why are the power outlet rates for the outdoor lots higher?

The rates are higher than indoor rates because the outdoor lots have minimal available power source locations. The cost is inclusive of getting power to multiple strategic power source locations in the lots. Getting the power from these locations to your booth is chargeable on a time and material basis, outside of the first ninety feet of cabling that is free. This may include cables, ramps, transformers, etc.

## Do I need lighting?

Full facility lights will be turned on during show hours; however, some exhibitors choose to enhance the look of their booth or product by directing light to these areas. TSE has different lighting options available. Contact TSE department pre-show for suggestions and recommendations.

## Can I hang my own lights?

Exhibitors (not EAC's) may hang up to four (4) arm lights per total booth space as long as the power does not exceed 2000 watts/20 amps.

## Do I need to order power for the lighting I use in my booth?

Power needs to be ordered for any lights brought in by an exhibitor or EAC. Power is included for lights ordered on the Lighting Order Form. Power is not included for lights ordered on the Standard Exhibit Systems and must be ordered separately.

## How do I know if I need to order labor?

Referencing the Show Site Work Rules, for safety and liability reasons, TSE is required to provide distribution of all electrical wiring from the main power source (MDL) along with orientation and measurements, and to other power locations in your booth typically run under carpet; this is considered Floor Work labor. A good rule of thumb for estimating your floor work labor is three extension cords per hour. You may also reference previous TSE invoices. Any connection of an electrical apparatus in your booth space exceeding total combined wattage of a 2000 watt/20 amp service must also be performed by electricians. This includes, but not limited to, hook-up of electrical equipment, distribution above carpet, installation of lights, monitors, hanging signs, and electrical booth structures; this is considered Booth Work labor. Both types of labor can be ordered on the Electrical Labor Order Form. Accurate estimates can help avoid additional show site labor for unscheduled returns/Go Backs. Additional electricians are billed at showsite rates. Exhibitors are responsible for managing the labor. Please notify the service desk immediately if you are not satisfied with the labor for any reason. Dismantle labor is calculated at 50% of the installation time and is based on the date and time the show closes and move-out time frames (overtime rates may apply); this is an automatic charge and does not need to be scheduled. If the nature of your booth requires specific dismantle requests, please advise TSE service desk. Equipment used for dismantle is billed at one (1) hour minimum. Labor orders submitted for Floor Work – Exhibitor Supervised and Booth work must provide date and time. TSE does not accept will calls. This is not considered a complete order. Regular or show site rates may apply. Floor Work – TSE Supervised does not require a date and time as this labor will be performed and completed prior to your arrival, dependent on receiving power, floor plan and payment.

## Do I need to order labor to hang my lights?

Referencing the Electrical Outlets Order Form for TSE lights: For inline and peninsula booths that require placement in the back of the booth, labor is included in the price of the lights. For peninsula and island booths that require placement away from the main power source and throughout the booth space, exhibitors are required to order labor. Keep in mind, depending on location and height, equipment may be required and billed accordingly. Typically, lights hung over 12ft require a scissor lift. Equipment rental is recommended for expediting larger quantities of light. If the lights are exhibitor owned, outside of the four (4) arm light rule, a labor order is required. If the lights are EAC owned, a labor order is required.

## What if I want to use my own cords and plug strips?

Exhibitors may use their own extension cords and power strips under the regulations provided on the Electrical Safety and Regulations form (to be used over carpet only and not exposed to attendee foot traffic). Be sure to advise the electricians working in your booth that you have brought your own materials. All materials under the carpet must be supplied by TSE for safety reasons.

010320 011095420

E-1b 112119

## What is an electrical floor plan and why do I need one?

A floor plan provides the electricians with the necessary information to perform the work requested in your booth space. A floor plan must have the following components: must be scaled, have orientation (call out the surrounding booths in accordance to front/back/sides in your booth), Main Drop Location (MDL), and power distribution points (provide specific measurements of these locations). TSE must also receive an electrical floor plan for placements of the 1000 watt overhead lights.

## How can I ensure that I receive the discount rates on my electrical order?

Be sure to submit the following by the electrical discount deadline date:

- Complete valid Payment and Credit Card Authorization.
- Order Electrical Outlets
- Schedule Electrical Labor if distribution is required or for the hook up of electrical apparatus.
- Return complete Booth Layout Form. Prefer submission in PDF or CAD form.

All of the items listed above must be received on or before the discount deadline date in order to receive the discount rates. If one item is incomplete or missing, the order is considered incomplete and the outlet rates will be placed at regular rates and the labor rates will be based on when a complete order is received. Common examples of incomplete orders are (but not limited to) unreadable floor plans, will call (missing date/time), bulk power, no main drop location, and power/floor plan revisions. If you have any questions or concerns, please contact us.

## How do I know if my Hanging Sign is Electrical?

Your sign is electrical if it requires electricity, requires a hoist or rotator, or exceeds 300lbs. Hanging Signs require lift equipment to reach the ceiling and must be ordered on the Hanging Sign Order Form. Hanging Sign must be received at the advanced warehouse and the order and payment to TSE office by the discount deadline date.

## What else should I know?

All floor plans are reviewed prior to show site in order to circuit a hall print for installation of power. A fee of \$50.00 will be billed for this time. If labor is scheduled and the electrician shows up and there is no one there to direct them, there will be a 1 hour not ready charge billed per worker requested. You will need to go to the service desk when you are ready to place a new order. Show site labor rates may apply.

Laborers are required when ordering booth work labor for installation of monitors over 37" and when cords need to be fished under carpet for floor work labor.

Additional charge of \$195.00 will be applied for every 1000 watt overhead light ordered when your booth is located in certain areas due to the nature of the building and equipment required to install these lights.

Materials are charged on an as needed bases and are added to your invoice. Be sure to budget for these incidentals like extension cords, plug strips and tape. TSE can assist you in estimating, though it is difficult to predict the length and amount needed until work is actually performed.

**Help**

**What is Exhibitor Supervision?** An exhibitor chooses Exhibitor Supervised so they are able to instruct the laborer in person. The exhibitor is required to be in the booth and there are no supervision fees. A Scheduled date and time is necessary for this choice.

**What is TSE Supervision?** An exhibitor chooses TSE Supervised when they want the work completed prior to their assigned target date and time. This allows exhibitors to start their booth build at their assigned target date and time. On most shows and services, there is a minimum surcharge (\$50.00 Minimum) for the professional supervision. Remember, when an exhibitor chooses this option, they do not need to schedule a date and time for services to be completed.

### Option 1

- Exhibitor Supervised
  - You must schedule date & time below as well as # of plumbers and estimated hours.
  - TSE assumes no liability for loss, damage or bodily injury arising out of the installation and/or dismantling of Exhibitor's property by TSE provided union labor. Exhibitor assumes the responsibility and any liability arising therefrom, for the work performed by union labor under Exhibitor's supervision. Exhibitors must stay clear during movement of freight.
  - Labor cannot be scheduled prior to assigned target date.

### Option 2

- TSE Supervised (OK to proceed without exhibitor.)
  - If this is left unmarked and a floor plan has been submitted, TSE will proceed with the labor. A 30% surcharge will be added to the labor rates above for this professional supervision.
  - Date and time not required. No need to complete Step 3. Proceed to Total and Sign.

## Step 3. Schedule Plumbing Labor for Exhibitor Supervised Labor Installation

Start time can be guaranteed only when labor is requested for the start of the working day at 8:00 AM. All exhibit labor for 8:00 AM start times will be dispatched to the booth space. Confirm labor and equipment by 2:30 PM the day before date requested. Please have an authorized representative in booth to supervise the work to be done and sign work order upon completion. Equipment and labor cancelled without a 24 hour notice shall be charged a one (1) hour cancellation fee per worker and equipment. If Exhibitor fails to use the workers and equipment at the time confirmed, a one (1) hour "Not Ready" charge per worker and equipment will apply.

The minimum charge for labor is one (1) hour per worker and equipment. Labor thereafter is charged in half (½) hour increments per worker and equipment.

Please estimate the number of workers and hours per worker needed for installation. Invoice will be calculated according to actual hours worked, relative to the original estimate and based upon the date received. Additional labor required will be calculated and invoiced at the show site rate. Exhibitors requiring plumbing installation labor will automatically be charged a dismantle fee. Dismantle labor is charged at 50% of installation labor based on show close/move-out days/time (overtime rates may apply), and does not need to be scheduled. If plumbers are required in booth at a specific time for dismantle, please notify the TSE Service Desk at the show.

Gratuities in any form, including cash, gifts, or labor hours for work not actually performed are prohibited by TSE. TSE requires the highest standards of integrity from all employees. All rates are subject to change if necessitated by increased labor and material costs.

**Payment for Services:** GES requires payment in full at the time services are ordered. Further, GES requires that you provide a credit card authorization with your initial order. For your convenience, we will use the credit card authorization information that you enter on the website to charge your account for services, which may include labor, material handling or any applicable fuel or energy surcharge.

**Discount Prices:** To qualify for discount pricing, orders must be received with payment on or before the discount deadline date.

**Method of Payment:** GES accepts MasterCard, Visa, American Express via this website.

**Third Party Billing:** Each exhibiting firm is ultimately responsible for all charges incurred on its behalf. GES reserves the right to institute collection action against the exhibitor if the authorized third party does not pay.

**Tax Exempt:** If you are tax exempt in the state in which you will be exhibiting, you must provide a Sales Tax Exemption Certificate for that state. Please send the above information to the GES office for this show. Taxes vary by location and will be added to your invoice, if you do not submit your tax exempt certificate prior to the deadline date.

**Adjustments and Cancellations:** No adjustments to invoices will be made after the close of the show. Please refer to the individual forms for labor, etc. for cancellation fees. All orders cancelled by the Exhibitor or due to the cancellation of an event or their non-participation may be subject to cancellation fees equal to 50% - 100% of the total order based upon the status of move-in, work performed and/or GES set-up costs or expenses. A minimum non-refundable deposit of \$25.00 will be applied toward the invoice, unless there is a cancellation of your order. All balances must be paid upon conclusion of the event. You agree to late fees up to 1.5% per month on any balance not paid at the conclusion of the event, or balance left without appropriate credit card on file.

For your convenience, we will use the credit card authorization to charge your credit card for any additional amounts ordered by your representative or services rendered to your company for this event.

GES will charge a convenience fee for each request to reprocess payment to an alternate credit card in order to cover incremental processing costs. An alternate credit card is a credit card different than the one used to process your initial payment in accordance with GES payment policy. The convenience fee will be quoted at the time your request is made to reprocess payment. The convenience fee will be added to your account balance and settled utilizing the new credit card provided.
